## EDUCATION

**University of Washington | College Arts and Sciences**

*Bachelor of Arts in Mathematics*

**Cumulative GPA:** 3.63/4.0

**Seattle, WA**

Class of 2024

**Relevant Coursework:** CSE 414 (Intro to Databases) | CSE 154 (Web Dev) | CSE 143 (Intro to Programming II)

MATH 307 (Intro to Differential Equations) | MATH 308 (Intro to Linear Algebra)

**Skills:** Java | Javascript | HTML | CSS | Node.js | SQL | Working with JSON Data

## Software Projects

### Flight Reservation App

*March 2022*

- Created a Flight Reservation App where users were to select a flight, log in and authenticate, then book that said flight
- My first go at real full stack application, where I had to design how the server handled request, how exactly should my data be structured and stored, as well as building a good and appealing UI for my users to use

### Currency Exchange API

*February 2022*

- Created an API allowing users to exchange currencies with rates as accurate as February 21st 2022. The project introduced me on how to build a rest API. Getting me familiar on how to properly handle requests from users
- In addition to the API I provided a client side application where users simply just clicked the currency they wanted to exchange and few moments later spitting out the exchange amount

### Weather App

*August 2021*

- Created an App allowing users to search the current weather of a said area. Providing Temperatures in Celsius and Fahrenheit as well as a quick description.
- The following was implemented using the WeatherApp API, was a great project practicing Asynchronous Client-Side Javascript

### Stopwatch Project

*July 2021*

- Created a simple Stopwatch app on my browser using tools like HTML CSS and some vanilla Javascript
- Was a great project further helping me learning about client side Javascript

## Work Experience

### The Institute for Learning & Brain Sciences (I-LABS)

**Seattle, WA**

Student Assistant

Jan 2022 - Now

- During my time at I-LABS I worked on a number of tasks for the Fiscal Departments. This included things sorting out files, handling sensitive financial material, and updating financial material for the department
- The following position helped me become more accustom on how to deal with sensitive info; as well being accustom to working in a lab environment and helping out research by keeping track of finances

### University of Washington Housing & Food Services

**Seattle, WA**

Student Assistant

Sept 2021- Dec 2021

- Under HFS I worked as a delivery driver in the mornings supplying the materials needed at the schools various coffee shop
- Great experience helping me become a bit discipline, learning how to balance school and work
