EDUCATION

University of Washington | College Arts and Sciences   **Seattle, WA**
Bachelor of Arts in Mathematics   Class of 2024
Cumulative GPA: 3.63/4.0
Dean's List, 3 quarters
Relevant Coursework: CSE 414 (Intro to Databases) | CSE 154 (Web Dev) |CSE 143 (Intro to Programming II)
MATH 307 (Intro to Differential Equations) | MATH 308 (Intro to Linear Algebra)

WORK EXPERIENCE

The Institute for Learning & Brain Sciences (I-LABS)   **Seattle, WA**
Student Assistant   *Jan 2022 - Now*
- During my time at I-LABS I worked on a number of tasks for the Fiscal Departments. This included things sorting out files, handling sensitive financial material, and updating financial material for the department
- The following position helped me become more accustom on how to deal with sensitive info; as well being accustom to working in a lab environment and helping out research by keeping track of finances

Dick's Sporting Good   **Tukwila, WA**
Footwear Associate   *June 2020* - Sept 2020
- Worked under the company's footwear division; overseeing sales on footwear and foot attire
- Was a great experience, further helping me develop soft skills around customers through customer assistance
- The position in addition, helped me develop leadership skills by teaching me the importance of galvanizing and energizing fellow work associates

Kentlake High School (Unpaid Position)   **Covington , WA**
Math Tutor   *Winter 2018 to Spring 2019*
- Looked to assist fellow classmates struggling in mathematics; topics include Pre-Algebra, Algebra, Geometry, Pre-Calculus

- A great opportunity in polishing my teaching skills; having a bit of prior practice assisting my younger siblings

Extracurriculars

Weather App   *August 2021*
- Created an App allowing users to search the current weather of a said area. Providing Temperatures in Celsius and Fahrenheit as well as quick description.
- The following was implemented using the WeatherApp API, was a great project practicing Asynchronous Client-Side Javascript

Stopwatch project   *July 2021*
- Created a simple Stopwatch app on my browser using tools like HTML CSS and some vanilla Javascript
- Was a great project further helping me learning about client side Javascript

Note Taking App   July 2021
- I created a simple App where users were able log notes on the screen by typing into a text bar and submitting it through a click of a button .
- The following was a great tool in teaching about use Javascript and manipulate the contents of the page as response to some user action

ADDITIONAL INFORMATION

Skills: Java | Javascript | HTML | CSS | Node.Js | SQL|
Interests: Software Engineering (Currently with a specific interest with Web- Development)
